

Colour circle featuring the mixing colours mixed with metallic and the colour flop and depth flop is also shown.

Tilted colour circle featuring the (multi-)effect colours:

- This tilted circle (flop 1 position) features all 'multi-effect colours' categorised according to main colour The multiple colour effect of these mixing colours is indicated on the colour bar in the circle •
- •
- When mixed, the complementarily positioned colours will produce a whitish result •
- This circle could be used for the purpose of adjusting the colour direction and for complementary colour shifts, • but only in the case of multi-effect colours
